

# PocketDay – BlackBerry Edition v6.0.0.6

## Requirements

PocketDay version 6 supports all BlackBerry devices with OS version 4.21 or higher. In order to use Weather, Financial information, Twitter and News (pro version) a BlackBerry data plan is needed.

## Installation Instructions

There are two ways to install PocketDay; via the desktop manager when your BlackBerry is connected to your computer or downloading it Over the Air (OTA) using the Blackberry's web browser. OTA downloads are recommended.

### OTA install

Launch the native browser on your BlackBerry  
Select Go To on the menu  
Enter the following URL:  
<http://www.pocketday.com/ota.htm>  
See <http://www.pocketday.com> for all the download URL's.  
You should see a screen prompting you to download PocketDay  
Select Download  
When the download is complete select Reboot Now if prompted to do so.  
You should now see the PocketDay icon on the screen

### Desktop Manager Install

Extract the PocketDay files to a directory on your pc  
Launch the BlackBerry desktop manager  
Double click on the Application Loader  
  
Follow the Wizard until you see the list of software on your BlackBerry  
Click the Add button  
Browse to the directory where the PocketDay files are located  
Highlight the PocketDay.alx file and select open  
Your BlackBerry will then reboot  
You should now see the PocketDay icon on the screen

- Added the ability for PocketDay to automatically detect changes to calendar and task items made in the native BlackBerry applications.
  - Corrected an issue with the RSS feed screen where on the 8700 it would only show on half the screen
  - 
  - **New Stock Information Provider**
  - **New Go To Date replaces the Go to Today key.** This now allows any date selection in any view (daily, weekly and monthly)
  - **Added a new communications transport that's able to be used generically on many carriers instead of WAP**
  - **Added new Start and Stop times for Refreshing Weather and Stocks.** This
    - On email reply's PocketDay now selects the proper "From" address for T-Mobile and others using the new BlackBerry Internet Service.
    - Cosmetic changes on Weather Display.
    - Tweaks for the 8700
    - Corrected an issue with showing All Day events on the wrong day in the Today view.
    - On missed calls when deleting an item focus remains on missed calls
    - Corrected an issue with not being able to turn off receiving SMS messages in PocketDay
    - Removed the month and year selection boxes on the Month View. The new Go To Today key replaces this.
    - Corrected an issue with the Month Date being wrong at the top of the screen
    - Corrected an issue with Email showing up in the wrong section of the screen under certain circumstances.
  - Corrected an issue with Daylight Savings Time and the World Clock Display.
  - **New SMS Handling**
    - Received SMS messages now show in the PocketDay Email Section
    - Can Reply directly in PocketDay
    - **NOTE: Messages also show up in the native Message app (you have to manually deal with them)**
  - **Voicemail indicators come in as SMS messages (Except Nextel) !!!**
  - Screen tweaks for the new 8700 devices and OS 4.1
  - Corrected an issue where the PocketDay Standby function didn't work on the WAP only version.
  - Corrected the Weather Lookup facility
  - **New Weather Location Lookup Facility**
  - Can now use either the “,” or the “+” to separate the stock symbols
  - Corrected an issue where a Java error would occur if you misconfigured the communications settings.
  - Corrected an issue with the Month Calendar displaying October 30 twice.
  - Dealt with a BB bug where the communications on the weather or stocks might cause undue battery drain on 7510/7520/7250 devices. Now when this occurs, the communications will be aborted, but the BB will probably have to be rebooted to get the weather and stocks

- refreshing again.
- 2.6 9/20/05
- Additional RSS fixes.
  - **PocketDay Settings are now backed up as a part of the normal Blackberry Backup/Restore process.**
  - **New setting for Manual Weather Refreshing – all communications can now be set to manual for complete control over network activity**
  - **New Stock Functions**
    - **When showing 1 Stock per line you will now see the % changed**
    - **With the Professional version you can select a stock and see complete details**
  - **New Support Menu option...opens a window to quickly send a support question / problem via email to us.**
  - Improved the parsing of RSS feeds to strip HTML tags out
  - Aligned Email Hotkeys when reading an email:
    - 72xx devices T=Top B=Bottom R=Reply L=Reply All
    - 71xx devices E=Top C=Bottom Q=Reply A=Reply All
- 2.57 9/8/2005
- Removed Bluetooth on the Keymapping section as it didn't work.
  - Added the new BB Messenger as an app you can map a key to
  - Corrected an issue with no info being shown in the monthly calendar on the 3<sup>rd</sup> Sunday in every month.
  - Changed the behavior of the New Event creation to default the start date to the correct date based on what date you have selected in the week or month views.
  - Increased the size of the field for an individual RSS story (would crash on large stories)
- 2.55 8/10/2005
- Corrected the Space Bar usage in the calendar to properly toggle Task Completion
  - Changed New Event creation to properly set the Start Date to the currently selected date on both the Daily and Weekly views.
  - Added the ability to Map a Key to the new BB Messenger App
  - Removed the Bluetooth keymap option as it didn't work.
  - Corrected an issue in the Month Calendar where the 3<sup>rd</sup> Sunday in every month wouldn't show any time bars.
  - Corrected a problem with the RSS Story display from the Today screen where PD would crash when the story had over 1000 characters.
- 2.54 8/1/2005
- Corrected an issue with selecting a 6 hour refresh interval and a PocketDay crash
- 2.53 7/28/2005
- **Changed the highlight on RSS Feeds on the Summary Screen to the Arrow like all the other sections to improve visibility on some themes.**
  - Corrected some errors on RSS feed setup, etc.
  - Corrected a problem with Marking Tasks as Complete from the Summary Screen (would seem to delete the incorrect entry on the screen)
- 2.52 7/25/2005
- **Created a new Professional Version of Pocketday**
  - **Added a new World Times section to the Today Screen (Professional version)**
    - **Can show up to 4 different timezones (Analog or Digital)**
  - **Added RSS Feeds (can show news, sports, traffic, etc.) (Professional**

### Version)

- **Added a Currency Conversion Screen (Professional version)**
  - **Added the ability to File email messages (Professional version)**
  - **All Today screen sections are now Collapsible / Expandable using the Space Bar**
  - Corrected the Get More functionality on reading email from within PocketDay
  - Corrected the Original From and To addresses when replying to or forwarding an email from within PocketDay
  - Added the ability to hit the Enter key when reading an email in PocketDay to jump to the native message app.
  - Corrected an issue with not being able to delete Missed Calls when there were calls from unknown people
  - Enabled Calendar and Task Notes field to be Active (ie. dial if phone number, get Link if URL, etc.)
  - Expanded the Weather Icons to use the complete set
  - **Added a new Keyboard Locking mechanism (see Settings/Key Mapping). The default key is the 'K'.**
  - **Added a new option to enable the Backlight when an email is received (this is great for the 7100 series devices). This only works when the device is NOT in the holster.**
  - Correction to Weather and Stock refresh when No Cell Service to skip the cycle instead of keeping on trying
  - Work around for Unknown Missed Calls to show all others (this is a known RIM bug and will be corrected in the next handheld software release from RIM)
  - Changed so that PIM information is refreshed after a Desktop or Wireless Synchronization
  - Expanded the Color selections to use the full range of BlackBerry Colors
  - Realigned the Title Bar for 7100 series devices
  - Realigned the Weather and Stocks for the 7100 series devices
  - For the 7100 made the 'Q' key behave the same for Replying to an Email
- 2.17            May 27, 2005
- Weather refresh keeps focus on weather
  - Weather time / date was overwriting temperature
  - Change to make all wap settings not mandatory input fields
  - **Added a new color for Past Due Tasks**
- 2.12            May 13, 2005
- **Added the ability to configure the # of Stock Symbols Per line**
  - **Customizable Fonts for the Today Screen**
  - Corrected the Appointment Scroll Off feature on the Today page to only function on the current date
  - Corrected an 'Empty' Email list after a desktop sync
  - Changed the behavior of email deletes on the summary screen so the next email after the one deleted is selected after a delete
  - Enabled the use of the Del key in the email view screen
  - Right aligned the stock prices
  - Corrected all issues with errors when using the Esc key out of any screen
- 2.1             May 6, 2005
- Corrected a problem with an error when trying to switch Weather
- 2.06            May 2, 2005

- locations
- Corrected a problem with a Null Pointer Exception when saving settings when Stocks were not being used.
  - Corrected a problem where a received email and a Max Email setting of 0 caused all unread email to be displayed
  - Corrected a problem with a Max Size of 0 for Unread email showing the word Empty on the today page
  - Corrected an issue with switching weather profiles
  - Implemented the 'QW' key for Replying to email for the 7100 series devices
  - **Added a Clear Speed Dial Menu item**
  - **Remove decimals on stock prices over 1000 (ie. indexes)**
  - **Added an option to NOT confirm email deletions**
  - **Added the ability to set the Title Bar Color**
- 2.05 May 1, 2005
- **Details on the Today Screen**
    - Missed Calls
    - Unread email
    - Appointments
    - Tasks Due Today
  - **Colors on Today Screen**
  - **Speed Dial directly from within PocketDay**
  - **Multiple weather locations**
  - Reorganized the Settings (new communications settings screen)
  - **Added support for WAP only connections**
  - No Service now Shown with a Red X over the signal bars
  - Corrected an issue where PocketDay would prompt you to save settings when you didn't change anything
  - Use of the Del key enabled on summary screen
  - **Read and reply to email directly from PocketDay**
  - **Missed calls now only show calls missed in the last 24 hours**
  - Email keys R – Reply To L – Reply All T-Top B-Bottom
  - **Able to select the max # of detail items for each section**
  - **Stocks are now a larger font, 2 symbols per line and show the amount of the daily change**
  - Added the ability to choose whether to scroll appointments off after the Start Time, End Time, or never (always show all appointments)
- 2.03 Apr 29, 2005
- Corrected an issue where PocketDay wouldn't start after re-arranging the Today screen.
  - Refresh weather option now refreshes the 3-day forecast and not just the current conditions
  - Changing the Stock Symbols or the Weather location now forces a refresh.
  - Corrected an issue with All Day events showing up on the day before they are supposed to (in addition to the correct day) in the daily agenda view and Today screen Appointment count.
  - Corrected a display issue on task due dates for the BB 7100 series devices where past due tasks in Italics were getting cut off using the default font Casual 9pt bold.
  - Added more detailed error reporting on the display of events
- 1.7 Apr 5, 2005

- Corrected an issue where a event that went from morning to evening would only be shown as an AM event in the month view
  - Corrected an issue using the “G” (go to today) key on the month view where it wouldn’t select the current day by default
- 1.671 Mar 17, 2005
- Now shows correct email counts after wireless or wired synchronizations
  - Made the Return key now launch the individual apps when on the Today Page.
  - Corrected one more issue with recurring tasks showing up multiple times.
- 1.66 Mar 16, 2005
- Correction to the backlight on holster removal and alarm to use the system default backlight level.
  - Correction to the daily agenda view to properly show recurring-all day events on the correct day.
  - Now won’t bring up PD if you’re on a phone call
  - Postpones stock and weather updates until after the current phone call completes (if you’re on the phone). This is because the BB can’t do any data operations while you’re on the phone.
- 1.61 Mar 11, 2005
- **Added a new feature to only Check the Inbox when looking at mail.** This option will improve performance for anyone that doesn’t have rules setup to automatically have messages delivered to specific folders (most BWC users).
  - **Enhanced the Stocks section to allow any number of stock symbols**
  - Added the ability to Reset the PocketDay Utilities (in case of issues with auto-backlighting, etc.) This is a new menu option (Util Reset)
  - **Moved the Key Mappings to their own screen (Key Settings)**
  - The About Screen now shows the PDUtills version and when the Utils settings are changed, they are acknowledged with a pop-up. This insures that the PDUtills is running.
  - **Added the ability to have up to 5 hot keys that can be configured to launch ANY program installed on your BB (Key Settings)**
- 1.56 Mar 8, 2005
- Enhanced the Title bar to recognize the BB Date and Time format settings (the date format is set in the PocketDay Settings)
  - More efficient program load process
  - Month view is a bit faster
  - Compressed the Summary screen lines a small bit so you can see both the stocks and the current weather conditions.
  - Corrected a problem with the Copy Task Function
  - Removed the Hide option from the menu (use new setting below)
  - Changed Stock quotes to NOT try and get Quotes on Saturday or Sunday.
  - Color coded the quotes (Blue is up and Red is Down)
  - Rearranged the Weather a bit
  - **Made the ESC key take you back to the BlackBerry Home screen without exiting PocketDay. To Exit PocketDay, select Exit from the menu. Set this option in the PocketDay settings.**
- 1.52 Mar 3, 2005
- Corrected Missed Call Count to only show missed calls that were NOT looked at yet.
  - Corrected an issue where emails received into non-Inbox folders wouldn’t be counted

- Made the Weather and Stock updates much more efficient
  - Moved the current temperature next to the weather picture and made it a larger font
  - Added a line under the title bar to better segregate the fields
  - Changed the Refresh Stock.Weather to be the default menu selection when you hit the trackwheel on one of those fields
  - Corrected various other bugs
  - Made the settings dialogs work as per BB standards
  - **Added a new Hide menu option to bring up the home screen (good for one handed operations)**
  - Made the Date Label on the Summary Screen optional
  - Made the PTT (Push-To-Talk) button turn the backlight on if PocketDay is the current application (only applicable to 7510/7520 devices)
- 1.32 Mar 2, 2005
- **Added a Stock refresh interval**
  - Corrected the Expanded / Collapsed menu options
- 1.26 Mar 1, 2005
- **Added the ability to re-arrange the Summary screen**
  - **Added Stock Quotes (up to 3)**
  - Corrected some issues refreshing the weather
  - Changed the week view to start on Today's date
- 1.25 Mar 1, 2005
- **Added a Weather Connection type for GSM users. Most users should leave this as default unless there's an issue. See the pocketday documentation for more detailed information.**
  - **The weather is now cached so when you start PD the last weather fetched is displayed. This helps when you're out of radio range.**
- 1.23 Feb 28, 2005
- **Added a real Weather plug-in and removed the browser version. This uses the weather.com XML feed.**
  - Corrected an issue where clearing the location field on a calendar item wouldn't clear it.
- 1.21 Feb 27, 2005
- Enhanced the Unread Email (handles BES and BWC better)
  - Email management is more efficient
  - Corrected Email count when synchronizing
  - Don't show 7pm for all day events in the daily view
  - Made the PocketDay Icon look better
  - **Added a new feature to make PocketDay your Idle screen. You can set the # of idle minutes before PocketDay returns to the top of the screen (Utils Settings)**
  - **Added a new feature to be able to disable the addition of PocketDay to the system menus (Util Settings)**
  - **Added the ability to have PocketDay start automatically when you reboot your BlackBerry (Util Settings)**
  - **Added a main menu HotKey for PocketDay. Pressing 'Y' from the home screen will launch PocketDay.**
- 1.1 Feb 23, 2005
- 1.01 Feb 20, 2005 Initial Release
